

### Theme – Settlers & Sustainability

#### English

Fiction from our literary heritage.

We will study William Shakespeare studying the text, Macbeth. We'll enjoy numerous versions of the story, engage in some drama activities, and have a go at writing in a similar style.

#### Maths

In maths our topics are 'Converting Units' and 'Angles'. We will practise using a range of metric measures and how to convert between different units. We will also explore imperial measures. We will then practise reading, comparing and studying angles.

#### Science

Our topic in science is materials. We'll learn how to classify different materials and why different items are made of different materials. We'll think about the advantages and disadvantages of different types of materials before planning our own investigation.

#### History / Geography

We have a geography topic this half-term: 'Settlers an Sustainability'. We'll think about what settlers need, how to conserve food, water and energy, think about where our food comes from and what fair trade is.

#### Art and Design / Design Technology

In D.T, we'll analyse item made using textiles, explore how textiles are joined, design a item using textiles and make an item using our sewing skills. After our planning and 'doing', we'll review our process and produce to see how we got on.

#### Music

South and West Africa is our music topic. We'll learn 'Shosholozu', a traditional South African song, play the accompanying chords using tuned percussion and learn to play the djembe. We'll also learn a traditional West African drum and add some dance moves.

#### French

'French Monster Pets' is our topic for this half-term. Our learning will involve learning French body parts, describing hybrid animals, and reading French text looking for clues about animals.

#### RE

What does it mean to be a Muslim in Britain today?  
We'll look at the different religions that make up our country, region and local area before thinking about the religion of Islam more closely. We'll focus on what helps Muslims through the journey of life.

#### Computing

In computing, we'll be thinking about what a search engine is, know that things online aren't always true, why keywords are so important and recognising the term copyright. We will also make parallels between book searching and internet searching.
